🔍 github

⌾ **GitHub**
Get updates from the world's leading development platform on Slack

⌾ **GitHub Notifications (Legacy)**
Source control and code management.

⏱ **Pull Reminders for GitHub**
Code review reminders for GitHub pull requests.

▬ **Simple Poll**
Create native and simple polls in Slack.

🤖 **Hubot**
GitHub's scriptable chat bot.

🔍 **See all results for "github"**

GitHub

App Info   Permissions

Bring your code to the conversations you care about with the GitHub and Slack app. With two of your most important workspaces connected, you'll get updates about what's happening on GitHub—without leaving Slack.

Subscribe to repositories

Use `/github subscribe [owner/repo]` in Slack to start receiving updates about that project.

Add GitHub Integration

Create a channel

Channels are where your members communicate. They're best when organized around a topic — #leads, for example.

Public ⬤ Anyone in your workspace can view and join this channel.

Name

> # github_log

Names must be lowercase, without spaces or periods, and shorter than 22 characters.

Purpose (optional)

> github commit log

What's this channel about?

Send invites to: (optional)

> Search by name

Select up to 1000 people to add to this channel.

Cancel **Create Channel**

Features

☑ **Wikis**
GitHub Wikis is a simple way to let others contribute content. Any GitHub user can create and edit pages to use for documentation, examples, support, or anything you wish.

☑ **Restrict editing to users in teams with push access only**
Public wikis will still be readable by everyone.

☑ **Issues**
Issues integrate lightweight task tracking into your repository. Keep projects on track with issue labels and milestones, and reference them in commit messages.

Get organized with issue templates
Give contributors issue templates that help you cut through the noise and help them push your project forward.

Set up templates

☑ **Projects**
Project boards on GitHub help you organize and prioritize your work. You can create project boards for specific feature work, comprehensive roadmaps, or even release checklists.
